FOOD ENGINEERING

A CHILTON PUBLICATION

FOR BETTER MANAGEMENT IN MANUFACTURING

EDITORIAL INDEX

January to December, 1965

Volume 37

CHILTON COMPANY · Chestnut & 56th Sts., Philadelphia, Pa. 19139

ANNUAL EDITORIAL INDEX

January to December, 1965—Volume 37

A

Absorption—(CO_2 absorption simplifies CA storage ....Apr. *129

Acids
Acid peeling now possible (at) (A) ....July 101
Improve product performance ....Aug. *77
Malic acid ....May 57
Malic acid (ia) ....Nov. 175
Malic acid challenges citric ....Jan. 122
Modified fumaric acid ....May *55
Modified fumaric acid has faster solubility (ia) ....Apr. 143
'New' acids challenge citric ....Oct. *101

Additives
Guards poultry quality (ia) ....Apr. 143
New-form PVP effective as beverage clarifier (ia) ....Feb. 119
Update of OK additives ....May 118

Adhesives—Tile-setting (sm) ....Dec. 134

Aerosols
Aluminum aerosol cap (ppo) ....Aug. 31
Eases aerosol dispensing ....Aug. *100
Opens gate for pressure-packed foods (ppo) ....Aug. 31

Agglomeration—Improve product performance ....Aug. 77

Air Dryers—Wall-mounted air dryer reduces downtime, costs (sm) .Sept. *160

Air Regulators—Uses latest equipment for environmental tests (dib) ..May *101

Air Vibrators—Bin actuators (e) ..Apr. *133

Analyzers
Analyzer detects 2 ppb of insoluble solids (e) ....June 123
Carbide reaction offers rapid moisture analysis (pi) ....June *67
4-component milk analyzer ....Jan. *125
Gages 0.01-100% moisture (fl) ....Feb. 117

Antioxidants—Natural antioxidant occurs in citrus fruit (at) (A) ..May 133

Apples—New shipper-displayer for dried apple dice (pp) ....July 25

Aseptic Canning—Speeds aseptic canning (e) ....Jan. 132

Aseptic Processing
Aseptic process auxiliaries ....Apr. *118
Sterile processor is self-contained (e) ....Oct. *140

Atmosphere Control—Reduces apple-storage costs with new CA system (dib) ....May *101

Atomic Absorption—Atomic absorption speeds precision trace-metal analysis. Herbert L. Kahn ...May *105

Automation
A step ahead in automation. G. G. Taylor and others (flowsheet) ..June *45
Automatic palletizing gains ....Sept. *100
Automation aids small packers. J. Philip Geddes ....Jan. *90
Closes gaps in can flow ....Jan. *82
Conveyorized weighers. John V. Ziemba ....Dec. *67
Door opens manually, closes automatically (e) ....Sept. *150
Machines pack assortments ....Feb. *66
Modernizes step-by-step. Kevin J. Hannigan ....Oct. *112

B

Bacteria
Food from microorganisms (at) (A) ....July 102
Influence of temperature on bacteria in eggs (at) (A) ....Dec. 107
Pure culture of bacteria for making quick vinegar (at) (A) ....Nov. 138

Bakeries and Baking
Dough-maturing reactions in rapid breadmaking (at) (A) ....Oct. 124
Dynamics of cake-baking (at) (A) ....Mar. 114
Improve product performance ....Aug. *77
Microwaves inhibit bread mold. Carl M. Olsen (table) ....July *51
New for baked goods ....Feb. *107
New mix makes 10 biscuits in 10 min for 10 cents (pp) ....June *27
No mixing needed (pp) ....Aug. *27
Salt effect on dough (at) (A) ...Sept. 105
Yields high-quality gluten. Frank Morton ....Dec. *83

Batch Blending—Simplifies batching of liquids ....Jan. *126

Batteries
Buys battery power (pi) ....Feb. *74
Handling made easier ....Feb. *71

Beer
Adjunct increases beer products 30-50% (ia) ....Dec. *132
Attempts to isolate 'paper' taste in beer (at) (A) ....Jan. 114
Bitterness in beer traced to boiling of wort (at) (A) ....Apr. 116
Formulates malt liquor into 'champagne' beer. S. Lederer and J. Delin ....Jan. *77
Home kitchen keg carbonates draft beer (pp) ....Feb. *27

Belting
Eliminates belt whipping (e) ....Aug. *108
—60F conveyor belting is efficient, sanitary (e) ....Dec. 130

Beverages
Coca-Cola expanding line (tm) ...Nov. 69
Instant chocolate drink (pp) ....Aug. *27
New fun drink comes in paper cabin (pp) ....Aug. *26
Soft drink landmark—bulk home dispensers (pp) ....Sept. *26
Start (pp) ....July 24
Twist orangeade mix (pp) ....July 24
Unpasteurized soft drinks may spoil more in cans (at) (A) ....Mar. 110

Bibliographies
Ingredient bibliography ....May 146
Packaging bibliography ....Mar. 141
Plant equipment bibliography ...Sept. 132
Processing bibliography ....Nov. 158

Blending
Advanced solids blending ....Oct. *105
Blends syrups in-line (dib) ....Feb. 91
Gravity mixing. FE staff ....Aug. *39
System blends two liquids in-line .Aug. *96

Boilers—Compact package boiler (e) May *159

Bread—New flour stabilizer aids bread making ....May 115

Brewing
Jacob Leinenkugel Brewing Co. (dib) ....Aug. 81
Makes new bread without alcohol. John V. Ziemba ....July 72

Bulk-Handling—Eliminates empty return trips ....Sept. *140

Butter Oil—Makes butter oil from whole milk ....Jan. *108

C

Cakes
Mixes in real candy (pp) ....Apr. *27
No-bake cheese cake (pp) ....May *29

Calculators—Versatile dial calculator (ia) ....Mar. *166

Can Making
Heavy-duty sheet folder speeds can making (e) ....June *122
Processes 500 aluminum cans per min (e) ....Oct. *142

Candy
Automatic line ....Aug. *94
Cooks, deposits candy at 600 per min (e) ....Mar. *153
Heller Candy Co. (pp) ....Nov. *28
Honeycomb extrusion press (e) ...Oct. *141
Luden's (pp) ....Aug. *28
Machines pack assortments ....Feb. *66
New nickel candy bar (pp) ....Aug. *27
Tepee-shaped carton (pp) ....Sept. *28

Canning
Checks cans for vacuum—at 500 per min ....Oct. *131
Cuts can-drying costs (dib) ....July 91
Why small canner buys hydrostatic cooker. Frank K. Lawler ....Oct. *64

Centrifuges
Cuts sugar losses (dib) ....Apr. 95
Refines oils efficiently at 25,000 lb/hr (e) ....May *164
Versatile pilot separator (fl) ....June *125

Cereal Grains—Cereal grains used in industrial fermentations (at) (A) ....Jan. 114

Cereals
Cooks, shapes, extrudes cereal grains (e) ....June *123
Easy eatin' for moms & moppets (pp) ....May *29
Improves product performance ..Aug. *77
New dried fruit disks for cold cereals. F. S. Nury, H. R. Bolin, and M. E. Lazar ....Aug. *85
Offer low-cost nutrition John H. Nair ....Aug. *82
Post honeycomb (pp) ....Aug. *28
Strips bran cleanly from wheat, other cereal (at) (A) ....Feb. 104

Chains
Flat-top conveyor chain (e) ....June *119
Ups conveyor performance with versatile chain (dib) ....June *79

Charts & Tables
Calculate residual moisture. Thomas F. Mach ....Dec. *90
Modern saran fills high-barrier needs. Richard Dunbrook ....Dec. *51

Cheese
Borden's twin pack (pp) ....Oct. *30
Flavor preference tests in creamed cottage cheese (at) (A) ....Oct. 124
No-bake cheese cake (pp) ....May *29
Process for low-fat, high-protein cheese (at) (A) ....Sept. *105
Upgrades cheese whey, solves disposal problem (dib) ....Nov. *113

Cheesecake—Pre-sliced cheesecake comes in eight flavors (pp) ....Feb. *27

Chelating Agents—Licenses use of EDTA in dressing products (ia) June 128

Chives—Freeze-dried chopped chives May 57

Chromatography
Chromatographic programmer (e) Oct. *141
Chromatographic sheets ease thin-layer work (fl) ....Apr. *141
Flavor components identified in chicken (at) (A) ....Oct. 123
Fusel oils identified in cider and perries (at) (A) ....Dec. 107
Pointers on handling chromatograph syringes (pi) ....July 77
Speeds chromatography (fl) ....Oct. *151

Citrus
Non-enzymic browning studied in lemon juice (at) (A) ....Oct. 123
Rectangular package for frozen citrus juices ....Nov. *27

Civil Rights—How to avoid discrimination ....Feb. 100

Classifiers—High-speed impact mill and classifier (e) ....Feb. *111

Cleaning
Biodegradable cleaner (sm) ....Aug. 114
Chlorinated, general-purpose cleaner (sm) ....Jan. 133
Cleaning solution (fl) ....Dec. 131
Equipment performance checklists ....Sept. 106
For heavy-duty wiping (e) ....Sept. 146
High-pressure wash gun (sm) ...Aug. 114
Impact grain cleaner ....Aug. *93
Low-foam cleaner (sm) ....Oct. 152
Rotor-jet unit provides sanitary tank cleaning (sm) ....Aug. 114
Washes with pressure in explosive atmospheres (sm) ....Apr. 142

Clouding Agents
Gum-type clouding agent ....May 58

Key To Departments

(at)	Advances in Technology
(dib)	Doing It Better
(fl)	For the Lab
(ia)	Ingredients & Additives
(ppo)	Packaging Pointers
(pp)	New Packages & Products
(pi)	Practical Ideas

(tm)	Tips to Management

*Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents.

Index to Vol. 37, January 1965 to December 1965

Coatings

Chemical
Resists paint breakdown (sm) ....Mar. 164
Electrically conductive—coating produces heat .....Jan. *128
Food
Coating prolongs storage of frozen pork chops (at) (A) .....Apr. 114
Coats foods with film. A. R. Nugarus .....Feb. *52
Crisp without frying (pp) .....Apr. *26
Easy-to-clean bottomer .....Aug. 94
Extrudes, coats sausage .....Nov. *164
Glaze coatings improved (ia) ....Feb. 119
Monoglyceride coating .....May *56
Nut-coating process improves shelf life, appearance .....Apr. *124
Glass—Simple spot check tells whether jars are coated (pi) ...Feb. *74
Maintenance
Ceramic coating curbs packaging-machine wear (pi) .....Aug. 65
PVF Film (pi) .....Sept. *77
Tubing gives rollers non-stick coating (e) .....Sept. *144
Package—Newest coatings add strength and variety .....Mar. *52
Paper—Modern saran fills high-barrier needs. Richard Dunbrook ..Dec. *51
Paperboard—Modern saran fills high-barrier needs. Richard Dunbrook .....Dec. *51
Teflon
Bonding (e) .....Dec. *130
Teflon surface (sm) .....Dec. 134
Walls—PVF film (pi) .....Sept. *77

Cocoa
Instant chocolate drink (pp) .....Aug. *27
Cocoa flavoring upgrades many products (ia) .....Nov. 175
Solidification mechanism of cocoa butter studied (at) (A) .....Sept. 104

Coconut Juice—Electricity produced from coconut juice (at) (A) ...Nov. 140

Coffee
Compact coffee jar (pp) .....Dec. *29
Simplifies production of coffee whitener (ia) .....Dec. 133

Color Control—Color comparator (e) May *166

Colorimeter—Versatile colorimeter (fl) .....Feb. *117

Colors
Apo-carotenal color now water-dispersible (ia) .....Aug. 115
Colloidal beta carotene is water dispersible (ia) .....Oct. 153
Color intensity recorder .....Aug. *92
Colorimeter-computer system (e) Aug. *169
Improves color control (fl) .....Sept. *158
International status of food colors. G. K. Parman .....May *96
Rotogravure process (ppo) .....Oct. 33
Simplified color sorter (e) .....Sept. *147
Where we stand on food colors. James E. Noonan .....Jan. *62

Communications
New book tells food story (tm) ..Mar. 59
Pocket radio receives telephone calls (e) .....Apr. *136
Silence industry's big sin? (tm) ..Mar. 59
Suggests fact center (tm) .....June 53
What employees want to read (tm) .....Jan. 61
What they tell employees (tm) ...Apr. 59

Compressed Air
Gas engines cut costs .....Sept. *96
Keep your compressed air pure, dry. Wilkes E. Hill .....June *90

Compressors
Compact rotary compressor (e) ..Feb. *111
Packaged compressor plant (e) ..Jan. *131

Computers
Are processes ready for computers? John V. Ziemba .....June *74
Colorimeter-computer system (e) .Aug. *109
Computer aids analysis (at) (A) .Mar. 110
Computer directs profitable distribution. Harold N. Keesee .....Oct. *55
Computer evaluation of wheat quality data (at) (A) .....July 101
Computer system monitors cost control (sm) .....Sept. *160
Cuts cost of electric computing (e) .....Jan. *130
Cuts programming costs .....Feb. *109

Concentration
Modify through patents
Covers: cereals, continuous processing, freezing, candy, agglomeration .....Nov. *129

Condensers
Micro kjeldahl distillation unit (fl) .....Dec. 131
Provides 1 liter per hr of extremely pure water (fl) .....Dec. *131

Construction
A & P builds efficiently with modern materials. P. F. Newmeyer and D. C. Parsons .....Sept. *48
Blends spaciousness with practicality .....Sept. *66
Building boom continues .....Sept. *51
Builds pace-setting plant. Frank K. Lawler .....Apr. *80
Builds 6-in-1 plant .....Sept. *56
Cuts construction costs (dib) ....Oct. *109
Do-it-yourself magnetic modules (e) .....May *158
Engineers flexibility with built-in future. Henry A. Lurie and John V. Ziemba .....Sept. *62
Giant plant gives Borden .....Sept. *68
Makes edible oils by remote control. J. Philip Geddes .....Nov. *73
New methods, materials reduce building costs .....Sept. *85
None quite so advanced .....Sept. *47
Nut plant transcends tradition. Frank K. Lawler .....Sept. *44
Offers resistant lining for cold-storage walls (sm) .....June *126
Plastic panels simplify "reefer"-room sanitation (e) .....Apr. *135
Systems engineering builds plant. J. Philip Geddes .....Nov. *64
Uses prefab construction (dib) ...Jan. 97
What the future will bring .....Sept. *55

Containerization—Trends in container usage (ppo) .....Oct. 33

Continuous Processing
Integrated operations: key to continuous 'franks'. John V. Ziemba .....Nov. *77
Long-Cut Drying Goes Continuous. Philip P. La Rosa and Alex K. Porianda .....July 61

Contract Packaging—What contract packaging can do for you. George Barr and John V. Ziemba .....Mar. *66

Controls
Can-line flow control .....Apr. *120
Closes gaps in can flow .....June *82
Computer system monitors cost control (sm) .....Sept. *160
Controls pH continuously (e) .....June 120
Coordinates process operations. Carl White .....Feb. *98
Diaphragm-valve design improves control (e) .....Nov. *172
Electronic system gages minute displacements (e) .....Aug. *106
Electro-optical unit (e) .....June *119
Gages process variables (e) .....Apr. *139
Improves color control (fl) .....Sept. *158
Irradiator unit (e) .....Aug. *108
Liquid-level controller .....Aug. *92
Metering unit offers uniform pump discharge (e) .....Feb. *112
Pump control (e) .....Sept. *145
Punched-card controller .....Apr. *118
Quick, direct, digital setting of times .....Apr. *118
Signal monitor eases process control (e) .....June *118
Signals batch end point (e) .....Apr. *136
Simultaneously controls temperature, humidity (e) .....Nov. *169
Step controller offers accurate programming (e) .....Feb. *113
System blends two liquids in-line .Aug. *96
TV controls product flow .....Oct. *120
Temperature controller (e) .....June *120
Two-gas atmosphere controller (e) Feb. *111
Valve system permits versatile flow control (pi) .....Nov. *95

Conveyor Belting
All-nylon reinforced conveyor belt (e) .....Jan. *131
Delrin chain (e) .....Feb. *116

Conveyors
Checks cans for vacuum—at 500 per min .....Oct. *131
Dynamically balanced (e) .....Oct. *141
Even-flow elevating conveyor ....Apr. *119
Improves Belt "tracking" (e) ....July 124
Improves can handling (e) .....Oct. 140
Improves handling of fragile return cases (dib) .....July 91
Pre-engineered .....Dec. *127
Reciprocating conveyor (e) .....Feb. *116
Rotary .....July 107
Self-unloading bulk carrier (dib) .Sept. *95
—60F conveyor belting is efficient, sanitary (e) .....Dec. *130
Speeds material handling (dib) ..Oct. 109
Spiral process conveyor .....Apr. *118
Stores, transports 80 ft of heavy conveyor track .....Sept. *77

Cooling
Cooling tunnels (e) .....Dec. 131
Cools trucks quickly (dib) .....Aug. *81
Nitrogen system cools panel trucks (e) .....Dec. *126

Cookers—Cooks, deposits candy at 600 per min (e) .....Mar. *153

Cookies—Packs soft cookies in individual wraps (pp) .....June *27

Cooking
Broadens cooking-oil line .....July 25
500-gal mix-cooker (e) .....Oct. *141

Corer—Size grader and corer .....Apr. *119

Corn—Quick-cooking grits (pp) ....Mar. *29

Corn Syrups—A step ahead in automation. G. G. Taylor and others (flowsheet) .....June *45

Corrections
Continental Can Co.'s "Royal Vac 100" .....May 166
DuPont's non-toxic paper coating, Quilon .....May 133

Corrosion
Cathodic protection (sm) .....Aug. *114
Corrosion detector (sm) .....Nov. 174
Curbs floor corrosion (dib) .....Dec. 97
Inhibited propylene glycol curbs metal corrosion (e) .....Oct. *142
Tubing gives rollers non-stick coating (e) .....Sept. *144

Costs
Cuts construction costs (dib) .....Oct. *109
Cuts food-service costs .....Dec. *118
Offer low-cost nutrition. John H. Nair .....Aug. *82
Turbine reduces power costs .....Nov. *166
Wall-mounted air dryer reduces downtime, costs (sm) .....Sept. *160

Counters
Counts cans at 1,000/min (e) ....Feb. *112
Electric counter (e) .....May *160
Electronic counters .....June *100

Crab Meat—Plastic can approved for crab meat. Kevin J. Hannigan ..Dec. *88

Curing Aids—Speeds color development, curbs fading .....May *156

Cutters
Dicer (e) .....Dec. 131
In-line chopper speeds product flow (e) .....Nov. *168

Cyclones—Heat-exchanger efficiency (pi) .....June 67

D

Dairy
Giant plant gives Borden .....Sept. *68
Reduce costly 'can float'. Howard Sorensen .....Oct. *66

Data Filing—Simplifies data filing (e) .....Jan. *132

Data Processing—Management information system provides tighter control. H. J. Cofer, Jr. .....Feb. *49

Dehydration
Better dehydrated celery through USDA process (at) (A) .....Oct. 124
Calculate residual moisture. Thomas F. Mach .....Dec. *90
Superheated steam aids explosive puffing. J. F. Sullivan, J. Cording, Jr., R. K. Eskew and W. K. Heiland .....Oct. *116
Superheated-vapor drying (at) (A) .....Aug. 89

Design—New sugar package boasts symbolic art (pp) .....Nov. *26

Density Control
Controls air density, speeds drying (e) .....July 118
Measures liquid density continuously, accurately (e) .....May *164

Desserts
Fast-thawing desserts have firmer texture (pp) .....Nov. *27
Jell-o golden egg custard (pp) ....July 24

Detectors
Corrosion detectors (sm) .....Nov. 174
Detects smoke in air conditioning systems (sm) .....Nov. *173
Non-destructive leak detector (e) .June *119
Sensitive device measures phosphorus in pesticides (at) (A) .....Feb. 103

Detergents
Combines two-way cleaning, special detergent to wash plastic beverage cases, cartons (sm) .....Oct. *152
Sterilizing agent (sm) .....Oct. 152

Diagrams
High-frequency heating gains ....Nov. *62
Modify through patents

Covers: cereals, continuous processing, freezing, candy, agglomeration ....Nov. *129
Oscillator circuit measures liquid level (at) (A) ....Nov. *138

Dielectric Ovens—High-frequency heating gains ....Nov. *62

Dietary Foods—New gal in town (pp) ....Oct. *27

Digital Blending
Blending system holds precise ratios (e) ....Feb. *110
How digital blending does better job ....Feb. 105

Directories
Quik-chek ingredients directory ..May 135
Quik-chek packaging directory ....Mar. 119
Quik-chek plant equipment directory ....Sept. 111
Quik-chek process equipment directory ....Nov. 143

Disintegrators—Shreds waste efficiency (e) ....Mar. *158

Distribution
Big savings possible (tm) ....Apr. 59
CP opens northwest center (tm) ..Apr. 59
Computer directs profitable distribution. Harold N. Keesee ....Oct. *55

Dog Food—Bows 3-flavor dog food multi-pack (pp) ....Jan. *27

Doors
Air door (e) ....Apr. *133
Door opens manually, closes automatically (e) ....Sept. *150
How to select right doors ....Sept. *90
Operates swinging doors (e) ....June 122
Plastic cold-storage door offers many advantages (e) ....Apr. *138

Doughs
How doughs may develop (at) (A) ....Mar. 110
How various glutens mix in doughs (at) (A) ....Nov. 138
Improve product performance ....Aug. 77
Meter measures power consumption during mixing of doughs in lab (at) (A) ....Oct. *123
Salt effect on dough (at) (A) ....Sept. 105
Stability of doughs under frozen storage (at) (A) ....Dec. 108

Dressings—Tips on making better dressings ....Feb. 88

Drives
Coordinates process operations. Carl White ....Feb. *98
Gearmotor drive (e) ....Apr. *133
V-belt unit has 3:1 ratio (e) ....May *162

Drums
Simplifies drum handling (e) ....Oct. *149
Unique liner guards product and drum (e) ....Sept. 146
Weighs 1/3 less than ordinary 55-gal drum (e) ....Oct. *150

Dryers
Flash-dries bulk material (e) ....Apr. *138
Keep your compressed air pure, dry. Wilkes E. Hill ....June *90

Drying
Calculate residual moisture. Thomas F. Mach ....Dec. *90
Controls air density, speeds drying (e) ....July 118
Drying with acoustic energy and a gas (at) (A) ....Dec. *107
New: dried fruit disks for cold cereals. F. S. Nury, H. R. Bolin, and M. E. Lazar ....Aug. *85
Superheated-vapor drying (at) (A) ....Aug. 89

Dust Collectors
Dust collector ....Aug. 93
Dust collector (e) ....May *166

Dust Filters—Self-contained dust filter (e) ....Dec. *127

E

Economics
Container shipments gain in 1964 (ppo) ....Jan. 33
Develops business yardsticks (tm) ....Jan. 61
One-ways headed for big year (ppo) ....Mar. 35
Outlines merger philosophy (tm) ..Feb. 59
Outlook '65. Frank K. Lawler ....Jan. *45
Trend to large-size studied (ppo) ..Mar. 35
USDA outlook optimistic ....Jan. *47
World food deficit to remain critical ....Jan. *49

Education
New 1.2 million building for Academy of Food Marketing (tm) ...Feb. *59
New school—new challenge (tm) ..June 53

Eggs
Egg whites pasteurized by new USDA process (ia) ....July 136
How egg-yolk color affects sponge cakes (at) (A) ....July 102
Improve product performance ....Aug. 77
Influence of temperature on bacteria in eggs (at) (A) ....Dec. 107
Pasteurizes liquid egg whites ....Apr. *102
Thaws frozen eggs fast. Frank K. Lawler ....Aug. *72

Electrodialysis—Electrodialysis of citrus juices decreases acidity, increases sweetness (at) (A) ....Apr. *114

Emulsifiers
Disperses quickly in cold-mix formulas ....May *51
Food grade calcium stearates (ia) Jan. 134
Improve product performance ....Aug. *77
Lecithin emulsifiers (ia) ....Aug. 115
New emulsifier lines (ia) ....June 128

Enzymes
A new amyloglucosidase ....May 56
Enzyme converts starch to dextrose directly (ia) ....Feb. 119
New pectinase enzyme ....May *55

Equipment
Equipment checklist ....Nov. 134
15 new food machines ....Apr. *118
Heater (e) ....Dec. *128
Laboratory grinder (fl) ....Aug. 113
Loads hoppers of process units (e) ....Oct. *140
Modernizes step-by-step. Kevin J. Hannigan ....Oct. *112
13 tips to improve production ....Jan. *120

Evaporators
Falling-film evaporator guards juice quality (e) ....Feb. 116
Pilot-size plate evaporator ....Apr. *119

Explosive Puffing—Superheated steam aids explosive puffing. J. F. Sullivan, J. Cording, Jr., R. K. Eskew and W. K. Heiland ....Oct. *116

Extruders
Continuous extruder ....Aug. *94
Extrudes, coats sausage ....Nov. *164
Improves extrusion of snack foods (e) ....Nov. *168

F

Feeding—Controlled vibration. E. A. Wahl ....Oct. *62

Fermentation
Adjunct increases beer production 30-50% (ia) ....Dec. *132
Role of pyruvic acid in alcoholic fermentation (at) (A) ....Nov. 140
Vinegar-making leaps ahead. Dr. H. Ebner ....Aug. *42

Filling—Carnation speeds packaging. J. L. Atherton and John V. Ziemba ....Aug. *61

Filters—Thin membrane provides efficient micro-filtration (e) ....Feb. 112

Finances—Pay raises can kill profit (tm) ....May 65

Fish
A small fish story (pp) ....July 25
Make mine with anchovies (pp) ..Apr. *27
New product puffs up (pp) ....Apr. *27

Flavor Enhancers
Enhances meat flavor (ia) ....Jan. 134
Enhances orange oil (ia) ....Sept. 162
Protein-hydrolysate combination ..May 57
Quality rises, costs drop ....May *52
Spray-dried flavor enhancer ....May 57

Flavors
Cocoa flavoring upgrades many products (ia) ....Nov. 175
Flavor components identified in chicken (at) (A) ....Oct. 123
Fortifies vanilla extract (ia) ....Mar. 166
Fried-onion concentrate ....May 58
Imitation meat flavor replaces beef extract (ia) ....Oct. 153
Simulates lemon oil (ia) ....Oct. 153
We're learning more about food flavors. Dr. Roy E. Moser ....Dec. *92

Floors
Acid proof floors more resistant today. Walter L. Sheppard, Jr. ...Oct. *59
Curbs floor corrosion (dib) ....Dec. 97
Epoxy resurfacer resists floor erosion (sm) ....Apr. *142
How to build better acid-proof floors. Walter J. Sheppard, Jr. ....Dec. *72
Jacob Leinenkugel Brewing Co. (dib) ....Aug. 81
Plastic flooring (sm) ....Sept. *161
Quick-cure epoxy flooring resists erosion, bacteria (sm) ....June 126
Quickly patches concrete equipment bases, floors (sm) ....Oct. 152
Steel floor mat promotes non-slip safety (sm) ....July 134
Wooden floors (sm) ....Dec. *134

Flour
High-flavor malt flour (ia) ....Feb. 119
High-protein flour made from parboiled rice (at) (A) ....Dec. 107
Improve product performance ....Aug. 77
Improves brick chili (ia) ....Sept. 162
Multiplies flour varieties. E. L. Griffin, Jr. and V. Pfeifer ....Jan. *86

Flow Meters—Improves fluid metering (e) ....Aug. *105

Flowsheets
A step ahead in automation. G. G. Taylor and others ....June *45
Branches mail lines into multi-processing. John V. Ziemba ....Nov. *88
Cold-pack produces quality peanut butter ....Nov. *92
Controlled crystallization—key to product quality. John P. Bolanowski ....Dec. *56
Conveyorized weighers . . . John V. Ziemba ....Dec. *67
Makes edible oils by remote control. J. Philip Geddes ....Nov. *73
Modify through patents
Covers: cereals, continuous processing, freezing, candy agglomeration ....Nov. *129
Mogen David innovates wine-making. Edward Gogel and John V. Ziemba ....Apr. *69
New in unit operations
Covers: heat applications, refrigeration, pickling, curing, freezing, fermentation, moisture removal, instrumentation, enzymatic processes, separation, forming, coating, ultrasonics ....Nov. *116
Offer low-cost nutrition (flowsheet). John H. Nair ....Aug. *82
Produces 36,000 weiners per hr. ..July 108
Treatment by activated sludge studies as aid in cannery waste disposal (at) (A) ....July 101
Upgrades cheese whey, solves disposal problem (dib) ....Nov. *113
Vinegar-making leaps ahead (flowsheet). Dr. H. Ebner ....Aug. *44
Yields high-quality gluten. Frank Morton ....Dec. *83

Fluidized Beds—Cooking foods with fluidized beds (at) (A) ....Jan. *114

Food Distribution—Blends spaciousness with practicality ....Sept. *66

Food Engineering Reports—New in unit operations ....Nov. *116

Food Standards—World food standards closer to reality. Elliot P. Fagerberg ....Oct. *126

Fork Trucks—Selecting fork trucks (pi) ....May 89

Forming
Automatic patty former ....July 107
Mechanizes production of hamburger patties (dib) ....Feb. *91

Frankfurters—Speeds weiner making Leonard P. Slotkowski and John V. Ziemba ....Feb. *54

Freeze-Drying
Continuous freeze-drying coming. William R. Ullrich ....June 64
Cuts food-service costs ....Dec. *118
Eases into freeze-drying. Frank K. Lawler ....July 94
Europe improves processes. John H. Nair ....July 63
Freeze-dried chopped chives ....May 57
Freeze-drieds popular in Japan (pp) ....Oct. *27
Freeze-dries 30 tons per day ....Mar. *146
Hex-tube freeze-dryer permits continuous F-D. W. C. Rockwell and others ....Apr. *49
Japan's changing diet paces its food industry. Samuel A. Goldblith ..Apr. *61
Latest design criteria for freeze-dry plants—Part I. Frederick Marich Apr. *52
Latest design criteria for freeze-dry plants—Part II. Frederick Marich ....June 85
Pre-slaughter injection aids freeze-dried beef (at) (A) ....Feb. 104
Simplifies evaluation of freeze-dry variables (fl) ....July 132
Studies made on freeze-drying rates and water sorption of model food gels (at) (A) ....June *95
Take pulse of freeze-drying ....Apr. *45

*Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents.

Index to Vol. 37, January 1965 to December 1965

Freezers
Continuous freezing system .....July 106
Flash freezer (e) .....Feb. *113
Insulated freezer .....July 106

Freezing
A & P pioneers flash freezing ....May *152
Freezes on trays or belt (e) .....Aug. *105
Freezing denatures proteins in muscle tissue (at) (A) .....Mar. 114
Increases N_2-freezing efficiency ...Apr. *126
Offers efficient cryogenic freezing of foods (e) .....Dec. *129
Redesigns twice for efficiency. A. W. Ruff .....Jan. *94

Frozen Foods
Deep-dish pies: family of heavyweights (pp) .....Jan. *26
Fast-thawing desserts have firmer texture (pp) .....Nov. *27
Frozen pancake batter eliminates mess, waste (pp) .....May *28
Frozen salad in plastic pouch (pp) Mar. *28
Thaws frozen eggs fast. Frank K. Lawler .....Aug. *72
Two new faces pop up in line (pp) Apr. *26

Fruits
Enhances orange oil (ia) .....Sept. 162
Grapes jubilee: a new fruit product (pp) .....Jan. *27
Irradiated strawberries reduce spoilage losses (at) (A) .....May 128
Natural antioxidant occurs in citrus fruit (at) (A) .....May 133
New: Dried fruit disks for cold cereals. F. S. Nury, H. R. Bolin, and M. E. Lazar .....Aug. *85
Peach drink tastes fresh, rates high in acceptance (at) (A) .....July 102
Puts squeeze on fruit packs (ppo) Aug. 31

G

Gages
In-line unit gages granule moisture (e) .....June *118
Liquid-level gage (e) .....Dec. *131
Remote sensing system (e) .....June *122

Gases
Drying with acoustic energy and a gas (at) (P) .....Dec. *107
Stores 24 tons of CO_2 (e) .....Oct. *147
Vacuum-packing in plastic retards trout spoilage (at) (A) .....Aug. 90

Generators
Insecticide fog generator (sm) ..Sept. *160
Molecular-sieve nitrogen generator (e) .....June *122

Glue—Special glue stabilizes unitized loads (e) .....Apr. 139

Glue Cartoning
Adopts redesigned, pre-glued carton (pp) .....Oct. *26
Pre-gummed tear-tape (ppo) ....Oct. 33

Gluing Equipment
For larger box flaps (e) .....Apr. *133
Space-saving compression unit ....June *100

Grains
Grain concentrator .....Aug. *93
Malted grains .....May *57

H

Heat Exchange—Teflon improves heat exchange .....Aug. *98

Heat Processing
Cuts heat-process time .....Oct. *138
Heat exchange—make it more efficient John P. Bolanowski .....Feb. *43

Heaters
Air-heater-blower (e) .....Oct. *150
Compact cooler-heater offers many advantages (e) .....Oct. *147
Continuous .....July 107

Heating
For microwave heating time to 915 mc or 2450 mc. R. V. Decareau (tables) .....July 54
Heats pipelines efficiently (dib) ..Mar. *94

Heaters—Heats and stirs (fl) .....Aug. *113

High Frequency Heating—High-frequency heating gains .....Nov. *62

Hoists—Has fewer components (e) .Mar. *154

Homogenizing—Unique homogenizer July 116

Hoses
Metal hose won't kink (e) .....Nov. *172
Sanitary washdown hose (sm) ...June 126

Humidity
Critical properties of air. Martin Hertzendorf (charts) .....July 98
Simultaneously controls temperature, humidity (e) .....Nov. *169

Hydrostatic Cookers—Why small canner buys hydrostatic cooker. Frank K. Lawler .....Oct. *64

Hydrostatic Sterilizers
Hydrostatic cookers pace Heinz processing .....Jan. *56
Simulates hydrostatic cooking (e) Jan. *130

I

Ice Cream
Factors influencing texture in ice cream. (at) (A) .....Sept. 104
Frost in the pumpkin (pp) .....Jan. *26
Tic-tac-toe (pp) .....Feb. *26

Indicators
Battery-discharge indicator for industrial trucks (e) .....June *120
Solid-state digital indicator (e) ..June *120

Industrial TV—TV controls product flow .....Oct. *120

Infra-Red—Heats with infra-red ...Jan. *118

Ingredient Suppliers—Ingredient suppliers .....May *66

Ingredients
Advances in ingredients .....May *47
Apo-carotenal color now water-dispersible (ia) .....Aug. 115
Controlled crystallization—key to product quality. John P. Bolanowski .....Dec. *56
Food grade calcium stearate (ia) Jan. 134
Food ingredients meet today's challenges .....May *48
Improves cottage cheese (ia) ....Jan. 134
Ingredient bibliography .....May 146
Ingredients '65 .....May *55
Ingredients spark new products. Kevin J. Hannigan .....June *39
Powdered fat emulsions 'tailored' to functions. P. P. Noznick and others .....June *68
Quik-chek ingredients directory ..May 135
Replaces beef extract—at 1/5 the cost .....Jan. 124
Speeds scaling of minor ingredients .....Oct. *134
World food standards closer to reality. Elliot P. Fagerberg .....Oct. *126

Insect Control
Kill insects electrically (dib) ....Apr. *95
More insects (sm) .....Mar. 164
Repels rodent pests .....Oct. *135

Insecticides—Insecticide fog generator (sm) .....Sept. *160

Instants
For overweight child (pp) .....Dec. *29
Instant chocolate drink (pp) ....Aug. *27
Instant shrimp cocktails (pp) ....Sept. *27
Portion-packed dry milk is made with cream (pp) .....Sept. *26
Simple to fix as instant coffee (pp) .....Dec. *29

Instrumentation—Critical properties of air. Martin Hertzendorf (charts) July *98

Instruments
Analyzer .....Aug. *92
Large-scale .....Aug. *105
Measures visual impact (at) (A) .Feb. *104
Measuring thermal diffusivity of foods (at) (A) .....Sept. *104
pH-to-current converter handles most electrodes (e) .....Dec. *129
Pointers on handling chromatograph syringes (pi) .....July 77
Simple device eliminates static on packaging film (pi) .....Feb. *78
Two-gas atmosphere controller (e) Feb. *111

Insulation
Curbs produce spoilage (dib) ....June *79
In one week: converts storeroom to freezer. David M. Feiges .....Feb. *106
Protects piping from high, low temperatures (sm) .....May *167

International Management
Inside Israeli food plants—Part II. Frank K. Lawler .....Oct. *84
Inside Israeli food plants. .Part III. Frank K. Lawler .....Dec. *98
Israel creates food industry.—Part I. Frank K. Lawler .....Aug. *46

Inventory—Simplifies inventory control of spare parts (pi) .....Feb. *74

Irradiation
Food irradiation. David M. Varner Nov. *53
Irradiated bacon stability (at) (A) .....Aug. 89
Irradiated strawberries reduce spoilage losses (at) (A) .....May 128
Irradiated-wheat quality depends on dosage (at) (A) .....May 128
Russia makes progress in food irradiation. Vadim Zagoryansky ...Nov. 57
Vitamin loss: eggs, wheat after gamma irradiation (at) (A) ....June 95

J

Jams and Jellies—Ways to improve jams and jellies .....Feb. 87

Japan—Japan's changing diet paces its food industry. Samuel A. Goldblith .....Apr. *61

Juices
Electrodialysis of citrus juices decreases acidity, increases sweetness (at) (A) .....Apr. *114
Fusel oils identified in cider and perries (at) (A) .....Dec. 107
Returns essence to dried cranberry juice. Eugene O. Strolle .....Jan. *70

K

Kettles
Sanitary design improved (e) ....Feb. *111
Simplifies kettle operation (e) ....Nov. *172

L

Lab Analysis—Direct method detects poisons in foods (at) (A) .....Apr. 114

Labor
Employee must show respect (tm) Mar. 59
Labor contract not enough (tm) ..Apr. 59

Laboratories
Comparative evaluation of food crushing sounds (at) (A) .....Aug. *89
Laboratory grinder (fl) .....Aug. 113
Magnifier eases reading of vernier scales (pi) .....Nov. *95
Measuring thermal diffusivity of foods (at) (A) .....Sept. *104
Simplifies evaluation of freeze-dry variables (fl) .....July 132

Law and Legislation
Align employment practices with new law (ed) .....Feb. 39
'Every ingredient must be safe.' George P. Larrick .....May 53
How to avoid discrimination ....Feb. 100
Who says there ought to be a law? (ppo) .....June 31

Leavenings—Releases more CO_2 during baking .....May *70

Level Detector—Fill-level detector (e) .....Apr. *133

Lift Trucks
Doubles as elevator (pi) .....Dec. *87
Drum handler (e) .....Apr. *133
Economy unit has advanced features (e) .....Sept. *144
Equipped with a push-pull attachment (dib) .....Oct. *109
Fibre-drum lifter (e) .....Mar. *160
How to maintain gas-powered lift trucks. Drexel B. Kirk .....Dec. *102
Inverter attachment transfers pallet loads (pi) .....Apr. *79
Switches to solid-state-control forklifts (dib) .....Nov. 113
Your lift truck: How should it be powered? George A. Smith .....Oct. *98

Lights and Lighting
Cuts lighting costs (pi) .....Feb. 74
Emergency lighting unit (sm) ....Dec. *134
Equipment performance checklists Sept. 106
Flourescent lamp (e) .....Aug. *108

Liquid Level—Oscillator circuit measures liquid level (at) (A) .....Nov. *138

Liquid Nitrogen—A & P pioneers flash freezing .....May *152

Lubricants—Guards critical machine parts .....Dec. 124

Lubrication
All-vegetable lubricant (ia) .....Nov. 175
Controls foaming (sm) .....Jan. 133
Durable chain needs no lubrication (e) .....Aug. *104
Removes water from vacuum-pump oil (sm) .....Dec. *134

M

Magnetic Handling—Handling with magnets. Arlo F. Israelson .....Jan. *106

Maintenance
Adjustable dockboard (e) .....June *122
Ammeter recordings simplify motor maintenance. L. Trauberman ..July 74
Battery-discharge indicator (e) ..June *120
"Best vinegar plant" built by Morton .....Aug. 45
Checks tire performance (dib) ....Oct. *109
Computer system monitors cost control (sm) .....Sept. *160
Detects bearing sounds (sm) .....Feb. *118
Durable chain needs no lubrication (e) .....Aug. *104
Epoxy resurfacer resists floor erosion (sm) .....Apr. *142
For heavy-duty cleaning (sm) ....July 134
Handling made easier .....Feb. *71
How to select right doors .....Sept. *90
Hydraulic lift-work platform (sm) Apr. *142
Hydraulic work platform is self-propelled (e) .....Feb. *111
Ice melter (sm) .....Nov. 174
Keeps drains fat-free. William Donnelly .....July 96
Liquid-pressure spray gun (sm) ..June *126
Miniature stack-type valves (e) ..Aug. *108
Mixing unit improved (e) .....Mar. *159
New methods, materials reduce building costs .....Sept. *85
Packing adjusts to load (e) .....Feb. *116
Plastic-metal piping requires no maintenance (sm) .....Nov. *173
Pointers on pump-packing-maintenance (pi) .....Oct. *81
Prevents breakdown of main refrigeration. Robert Cummings ....Sept. *103
Pump connector (e) .....Sept. *145
Quickly patches concrete equipment bases, floors (sm) .....Oct. 152
"Snap-on" (e) .....Sept. *145
Steel floor mat promotes non-slip safety (sm) .....July 134
Water-compatible plastic compound (sm) .....Jan. *133

Malt
High-flavor malt flour (ia) .....Feb. 119
Malted grains .....May *57

Management
Be good corporate citizen (tm) ..June 53
Critical path scheduling helps you solve production problems. J. L. Riggs and R. D. Langmo (charts & tables) .....June 48
Coca-Cola expanding line (tm) ...Nov. 69
Corrects shortage situation (tm) ..Nov. 69
Dramatizes safety principles (tm) Aug. 53
Food men hold hungry world in their hands (ed) .....June 33
GMI writes success formula (tm) Mar. 59
Gets quick payoff on capital (tm) Dec. 65
Half your future lies in better packaging (ed) .....Mar. 41
Help U. S. win world food standards battle (ed) .....May 43
Hot-entree vending offers big research payoff (ed) Frank K. Lawler .....Oct. 45
How to avoid discrimination .....Feb. 100
How to gain respect (tm) .....May 65
Israel creates food industry. Frank K. Lawler .....Aug. *46
Keep an eye on new commission's activities (ed) .....Apr. 33
Keep employees informed (tm) ....Dec. 65
Keeps investing in success (tm) ..Aug. 53
Libby gears to foreign growth (tm) .....Feb. 59
Looks over horizon (tm) .....Nov. 69
Make big products pay big (tm) ..Aug. 53
Management is art and science (tm) .....Sept. 61
Midyear outlook never more challenging (ed) Frank K. Lawler ..July 41
Must ease profit pinch (tm) .....Aug. 53
Nabisco creates packaging V-P (tm) .....Mar. 59
New food factories pace progress (ed). Frank K. Lawler .....Sept. 39
Opinion. Frank K. Lawler .....Nov. 49
Opinion. Frank K. Lawler .....Dec. 43
Put new plants in country (tm) ..Nov. 69
Reduce operational costs. E. M. Babb and M. A. Johnson .....Apr. *98
Sharpens suggestion program (tm) June 53
Sharpens top management (tm) ..Dec. 65
Sounds warning on quality (tm) ..Dec. 65
Straighten out standards problems in '65 (ed) .....Jan. 41
Swells retirement income (tm) ....Apr. 59
That's why GF is dynamic (tm) ..Sept. 61
The Philippines offer opportunities to U. S. food processors. Mr. Alfred J. Stokely .....July 104
They read to succeed (tm) .....Apr. 59
Time to take nutritional ball from AHA (ed) Frank K. Lawler ...Aug. 33
Tips millers to profit (tm) .....Dec. 65
Tips on product development (tm) Aug. 53
What they say to workers (tm) ..Sept. 61

Margarine
Fluid margarine packed in squeeze bottle (pp) .....Feb. *26
Pourable margarine for cooking or dining (pp) .....Dec. *29
Soft margarine spreads when cold (pp) .....Sept. *26

Materials Handling
Automatic palletizing gains .....Sept. *100
Cuts handling costs with slip-sheet unloading (dib) .....Mar. *93
Cuts starch-handling cost (ia) ....Dec. 122
Eases container handling (pi) ....Sept. *77
Eases material handling (pi) ....Sept. 77
Eliminates empty return trips ..Sept. *140
Improves bin discharge (e) .....Sept. *146
Improves can handling (e) .....Oct. 146
Improves handling of fragile return cases (dib) .....July 91
Live-storage rack (e) .....Sept. *145
Loads hoppers of process units (e) .....Oct. *140
Meat loading down under. Leo Walter .....Aug. *87
Polypropylene trays for baked goods (e) .....Feb. *116
Secures trailer loads with wrap and strap .....Oct. *118
Self-unloading bulk carrier (dib) Sept. *95
Simplifies drum dumping (pi) ....Oct. *81
Simplifies drum handling (e) .....Oct. *149
Simplifies efficient loading of box cars (e) .....Sept. *144
Speeds cargo handling .....Apr. *123
Speeds material handling (dib) ....Oct. 109
Speeds palletless handling of milk-case loads (pi) .....Dec. *87
Spiral chute (e) .....Sept. *156
Stores, transports 80 ft of heavy conveyor track (pi) .....Sept. *77
System cuts rehandling of empty milk cases (pi) .....June 67
System eases handling of below-dock-level loads (pi) .....Sept. *77
Stacker, destacker units take two rows of cases (e) .....Sept. *156
"Throw-away" inflatable dunnage bag (e) .....Aug. *109
Tile-setting (ia) .....Dec. 134

Meat Processing
Mechanizes production of hamburger patties (dib) .....Feb. *91
Speeds wiener making. Leonard P. Slotkowski and John V. Ziemba Feb. *54

Meats
Effect of polyphosphates in curing of meats (at) (A) .....Apr. 114
Engineers flexibility with built-in future. Henry A. Lurie and John V. Ziemba .....Sept. *62
Hydrogen sulfide affects flavor and color of meat (at) (A) .....Apr. 116
Imitation meat flavor replaces beef extract (ia) .....Oct. 153
Instant chilling of hip joint curbs 'sour round' .....Jan. *83
Integrated operations: key to continuous 'franks'. John V. Ziemba ..Nov. *77
Irradiated bacon stability (at) (A) .....Aug. 89
Meat loading down under. Leo Walter .....Aug. *87
No bears about it (pp) .....June *26
Pack fine steaks for holiday gifts (pp) .....Jan. *27
Packs cold cuts in zip-open packs (pp) .....Sept. *27
Potentiometric method determines NaCl in meats (at) (A) .....June 95
Pre-slaughter injection aids freeze-dried beef (at) (A) .....Feb. 104
Produces 36,000 wieners per hr. (flowsheet) .....July *108
Prolongs shelf life of frozen pork sausage .....June 110
Sliced meats from coast (pp) ....Nov. *28
Trends in meat packaging (ppo) ..Feb. 35

Membrane Processing—Concentrates food at room temperature ... Dec. *120

Membranes—Membrane processes arrive. Frank K. Lawler .....Nov. *58

Metering—Metering unit offers uniform pump discharge (e) .....Feb. *112

Meters
Eliminates entrapped air (e) ....Mar. *157
Meter measures power consumption during mixing of doughs in lab (at) (A) .....Oct. *123

Microwave Systems—New microwave systems simplify pilot operation Mar. *148

Microwaves
For microwave heating tune to 915 Mc or 2450 Mc. R. V. Decareau (table) .....July *54
Microwaves inhibit bread mold. Carl M. Olsen (table) .....July *51

Milk
All-dairy product offers lower-cost milk protein (ia) .....Aug. *115
Cause of bitter taste in milk products (at) (A) .....Oct. 123
Cheaper way to make nonfat milk powder (at) (A) .....Sept. 104
For overweight child (pp) .....Dec. *29
How tinplate affects evaporated milk in storage .....Aug. 90
Keeps milk fresh for 6 months—without refrigeration .....June *104
"None quite so advanced" .....Sept. *47
Plastic milk bottles (ppo) .....Sept. 33
Portion-packed dry milk is made with cream (pp) .....Sept. *26
Sensitivity to cow's milk (at) (A) Mar. 116
Simple alkali test detects off-odors in milk (at) (A) .....June 95
Wetting agent improves quality of sterile milk (ia) .....Dec. 133

Mills
High-speed impact mill and classifier (e) .....Feb. *111
Tomato puree mill .....Apr. *118

Mixers
Continuous whipper .....Aug. *94
500-gal mix-cooker (e) .....Oct. *141
Heats and stirs (fl) .....Aug. *113
Liquid mixers, agitators and how to select them. J. B. Ludwig (charts & tables) .....June *54
Mixes in closed drums (e) .....Mar. *154
Self-feeding grinder .....July 107

Mixes
Instant pie-crust mix (ia) .....Mar. 166
Mixes in real candy (pp) .....Apr. *27
New mix makes 10 biscuits in 10 min for 10 cents (pp) .....June *27
Rice-with-spice mix (pp) .....June *27

Mixing
Controlled vibration. E. A. Wahl ..Oct. *62
Gravity mixing. FE Staff .....Aug. *39
Pilot unit determines optimum mixing method (fl) .....Oct. 151
Reduces mixing costs .....Oct. *136

Motors
Ammeter recordings simplify motor maintenance. L. Trauberman ...July 74
Gearmotor permits flexible mounting, saves space (e) .....May *159
Lightweight motor (e) .....June *119
Offers light weight, complete ventilation (e) .....July 126
Variable-speed control (e) .....Dec. *129

Mushrooms—Dulany Foods is marketing (pp) .....May *30

N

New Food Plants
A & P builds efficiently with modern materials. P. F. Newmeyer and D. C. Parsons .....Sept. *48
"Best vinegar plant" built by Morton .....Aug. 45
Blends spaciousness with practicality .....Sept. *66
Building boom continues .....Sept. *51
Builds institutional business (tm) Feb. 59
Builds 6-in-1 plant .....Sept. *56
Engineers flexibility with built-in future. Henry A. Lurie and John V. Ziemba .....Sept. *62
Giant plant gives Borden .....Sept. *68
Makes edible oils by remote control. J. Philip Geddes .....Nov. *73
"None quite so advanced" .....Sept. *47
Nut plant transcends tradition. Frank K. Lawler .....Sept. *44
Systems engineering builds plant. J. Philip Geddes .....Nov. *64
Vinegar-making leaps ahead. Dr. H. Ebner .....Aug. *42
What the future will bring .....Sept. *55

New Food Products
Accents flavor, color codes cans (pp) .....Apr. *27
Adds to line (pp) .....Jan. *26
All-dairy product offers lower-cost milk protein (ia) .....Aug. *115
Buttered barbecue sauce (pp) ....Oct. *27
Butter-pecan concentrate (ia) ....Aug. 115
Cap'n Crunch cookies (pp) .....Oct. *30
Chef's compliments—for the housewife (pp) .....Nov. *27
Easy eatin' for moms & moppets (pp) .....May *29
Enters frozen field with Mexican specialties (pp) .....Aug. *27
Freeze-drieds popular in Japan (pp) .....Oct. *27
Frozen salad in plastic pouch (pp) Mar. *28
Grapes jubilee: a new fruit product (pp) .....Jan. *27
Heat & eat fried rice (pp) .....Mar. *28
Improves brick chili (ia) .....Sept. 162
Ingredients spark new products. Kevin J. Hannigan .....June *39
Instant chocolate drink (pp) ....Aug. *26
Instant shrimp cocktails (pp) ....Sept. *27
Institutional line heads product splurge (pp) .....Nov. *26
Luden's (pp) .....Aug. *28
Make mine with anchovies (pp) ...Apr. *27
New 'concept' in pickles (pp) ....Jan. *27
New fun drink comes in paper cabin (pp) .....Aug. *26

*Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents.

Index to Vol. 37, January 1965 to December 1965

New gal in town (pp) ..... Oct. *27
New nickel candy bar (pp) ..... Aug. *27
New products puffs up (pp) ..... Apr. *27
New product with south-of-border flavor (pp) ..... Oct. *26
No mixing needed (pp) ..... Aug. *27
Portion-packed dry milk is made with cream (pp) ..... Sept. *26
Post Honeycomb (pp) ..... Aug. *28
Quick-cooking grits (pp) ..... Mar. *29
Simplifies producing vegetables in sauces (ia) ..... Aug. 115
Solid soup base is made to measure (pp) ..... Dec. *28
Spoonable spaghetti (pp) ..... Dec. *30
Sweet cherry pickles awaiting your call. Robert L. Smith ..... Feb. *85
Two new faces pop up in line (pp) ..... Apr. *26
Two vending items (pp) ..... Apr. *27

Nitgrogen—Increases N_2-freezing efficiency ..... Apr. *126

Nozzles—Atomizing nozzle offers on-off control (e) ..... Aug. *112

Nutrition

AHA issues strong statement on diet ..... Aug. 54
Food, fats and foibles. Dr. Glen King ..... Aug. 56
Offer low-cost nutrition. John H. Nair ..... Aug. *82

Nuts

Accents flavor, color codes cans (pp) ..... Apr. *27
Nut plant transcends tradition. Frank K. Lawler ..... Sept. *44
Presses calories from nuts. Frank K. Lawler ..... Sept. *138

O

Oiler—Maintains oil level (sm) .... Feb. *118

Oils and Fats

Broadens cooking-oil line (pp) .. July 25
Corn oil found uniform (at) (A) .. June 96
Fat crystallography points way to quality. Charles W. Hoerr and John V. Ziemba ..... May *90
Food, fats and foibles. Dr. Glen King ..... Aug. 56
For salad makers (pp) ..... May *29
Frying oil (ia) ..... Dec. 133
Makes edible oils by remote control. J. Philip Geddes ..... Nov. *73
Qualities of margarine and shortening can be studied through work-softening (at) (A) ..... Mar. *110
Refined soybean oils boast quality, stability. John V. Ziemba (table) July *57
Soft margarine spreads when cold (pp) ..... Sept. *26
Solidification mechanism of cocoa butter studied (at) (A) ..... Sept. 104
Synthetics offer qualities of natural essential oils (ia) ..... Nov. 175

Onions

Dehydrated onion product ..... May 56
Fried-onion concentrate ..... May 58

Ovens

Oven improves puffing, toasting (e) ..... May *158
3-tier infra-red oven saves space (e) ..... Jan. *130

P

Package Control

Checks metered charge before package filling (e) ..... July 129
Unit displays package-weight data (e) ..... July 118

Packaging

California adopts can-seam inspection ..... Aug. *67
Carnation speeds packaging. J. L. Atherton and John V. Ziemba .. Aug. *61
Checks cans for vacuum—at 500 per min ..... Oct. *131
"Custom-fits" round bread. Arthur S. Green ..... July 70
Designs and materials have 'future' look today ..... June *102
FE editors present: packaging advances ..... Mar. *43
Half your future lies in better packaging (ed) ..... Mar. 41
Improves handling of fragile return cases (dib) ..... July 91
Machines pack assortments ..... Feb. *66
Modernizes step-by-step. Kevin J. Hannigan ..... Oct. *112
New flexible packaging center (ppo) ..... Aug. 31
New sugar package boasts symbolic art (pp) ..... Nov. *26
Opens gate for pressure-packed foods (ppo) ..... Aug. 31
Packaging tomato ketchup in plastic and aluminum (at) (A) .. July 102
Package-line layout saves space, eases control (pi) ..... Aug. *65
Rectangular package for frozen citrus juices (pp) ..... Nov. *27
Reduce costly 'can float.' Howard Sorensen ..... Oct. *66
Secures trailer loads with wrap and strap ..... Oct. *118
Tips from machine maker. E. Lakso ..... Mar. 62
28 units improve packaging ..... Dec. *110
Urges less dependence on tin (ppo) . Aug. 31
What contract packaging can do for you. George Barr and John V. Ziemba ..... Mar. *66

Packaging Equipment

Baggers

Fills milk into plastic bags ..... Dec. *115
3 versatile packaging systems .... Dec. *111

Can Makers—Can body maker ... Apr. *120

Cappers

Caps 300 containers/min (e) ..... Aug. *108
2 efficient labelers, capper ..... Dec. *111

Carton Openers—Compact carton opener ..... Jan. *121

Cartoners

Compact ..... Aug. *95
Forms, top-loads, seals seal-end-type-cartons (e) ..... June *124
Improves shorter-run cartoning (e) ..... Apr. *132
3 versatile packaging systems .... Dec. *111

Casers—Wrap-around packager .. June *98

Checkweighers

Air-cylinder rejector (e) ..... Dec. *127
Automatic checkweigher ..... Aug. *93
Batch-weighing (e) ..... Nov. *170
Checkweighs 300 containers per min (e) ..... May *158
Conveyorized weighers . . . John V. Ziemba ..... Dec. *67
Precision weighing cell ..... June *100
Recording checkweigher improves quality control (e) ..... Oct. *146
Servo feedback controls weight of dough pieces (e) ..... Aug. *106
Short-count checker (e) ..... Nov. *169
3 precision checkweighers ..... Dec. *111
Warns of low or high package weight (e) ..... Aug. *104

Closers

Can closer operates at 1,400 per min (e) ..... Dec. *126
5 bag closers, packers ..... June *99

Coders

Bottom coder (e) ..... Dec. *127
Bottom coder for cans and glass (e) ..... Apr. *133
Fast label coder, tube and box sealers ..... Dec. *112
"3 in 1" coding system (e) ..... June *121
Wooden-bung (e) ..... Dec. 131

Counters—meat balls are counted into cans ..... Apr. *120

Ejectors—ejects upside-down cans going to filler (e) ..... Feb. *110

Feeders

Belt feeder curbs particle separation (e) ..... Dec. *128
Feeder offers 100% electrical control (e) ..... Dec. *126
Gravimetric feeder ..... Aug. *93
Liquid-to-solid ..... Aug. *93
Precision feeders produce uniform speed (pi) ..... July 77
Product feeder (e) ..... Dec. *127
Sanitary unit delivers any dry material (e) ..... May *160
Speeds scaling of minor ingredients. Oct. *134

Fillers

Bulk-dribble filler (e) ..... Mar. *155
Fast-gentle, 18-pocket gravity filler ..... Apr. *120
Fillers combine speed, accuracy .. Dec. *113
Form-fill packager ..... Aug. *95
Gravity filler ..... June *100
Heavy-products filler (e) ..... Sept. *145
Improved dispensers ..... Apr. *120
Meat balls are counted into cans .. Apr. *120
Precision net weigher fills free-flowing items (e) ..... Sept. *147
Rotary 50-spout filler ..... Jan. *120
Speeds powder filling (e) ..... Aug. *106
16-piston filler has single valve (e). Apr. *132
Uses high-speed pocket filler for strawberries (dib) ..... Jan. *97
Vacuum-lift system speeds small-cup filling (e) ..... June *120

Formers

Compact ..... Aug. *95
Form-fill packager ..... Aug. *95
Forms, cuts, wraps 1,200 sandwiches per hr (e) ..... June *121
3 versatile packaging systems .... Dec. *111

Formers-Fillers-Sealers

Armour & Co. speeds efficient vacuum packaging (dib) ..... Jan. *97
Bag former (e) ..... Aug. *113
Bagmaker ..... Aug. *95
Form-fill-seal unit (e) ..... Mar. *155
Form-fill-seal unit is fast, versatile, efficient (e) ..... Nov. *169
Pillow-packs hot foods (pp) ..... Dec. *29
Saves 20% in case cost (dib) .... Mar. *93
60-per-min ..... Aug. *95
2 advanced form-fill-seal units ... June *98

General

Better equipment spurs heat-in-pouch growth. J. W. Nordenson .. Mar. *88
15 advanced machines for better packaging ..... June *98
How modern equipment improves your packaging ..... Mar. *54
Tips from machine maker. E. Lakso ..... Mar. 62

Labelers

Portable unit threads printed, glued paper collars over necks of bottles ..... Jan. *120
2 efficient labelers, capper ..... Dec. *111
2 high-speed labelers ..... June *98

Packers

Can and bottle packer ..... Jan. *121
Case packer ..... Jan. *121
Filler-cartoner (e) ..... Jan. *131
5 bag closers, packers ..... June *99
Novel case-packing reduces can damage ..... Mar. *108
Packs 'difficult' items (e) ..... Oct. *148
Multi-packs two-piece aluminum beer cans (dib) ..... Nov. *114
3 advanced packers ..... Dec. *113

Sealers

Automatically seals cases of 26 different sizes (dib) ..... Sept. 95
Fast label coder, tube and box sealers ..... Dec. *112
Makes 4-seal packages (e) ..... Sept. *150
Stackers—Stacker, destacker units take two rows of cases (e) .... Sept. *156
Unloaders—Case unloader-unscrambler (e) ..... Jan. *131
Unscramblers—Case unloader-unscrambler (e) ..... Jan. *131
Weighers—Cuts product giveaway (dib) ..... Jan. 97

Wrappers

Cut-and-wrap machine ..... Aug. *95
Foiling machine ..... Aug. *95
Forms, cuts, wraps 1,200 sandwiches per hr (e) ..... June *121
4 cost-cutting wrappers ..... Dec. *112
Novel case-packing reduces can damage ..... Mar. *108
Overwraps various cartons, trays at 120 per min (e) ..... Feb. *113
Ups wrapping efficiency (dib) .... Feb. *91
Versatile unit ..... Aug. *95
Wax-paper overwrapper (e) ..... Oct. *141
Wraps, heat-seals various cheese cuts (e) ..... June *118

Packaging Materials

Adhesives

Compact hot-melt-adhesive applicator (e) ..... Sept. *145
Dextrine adhesive (ppo) ..... Dec. 33
High-speed, resin-based adhesives (ppo) ..... Sept. 33
Horizons widen for hot melts (ppo) ..... July 31
Hot melts pace high-speed sealing Mar. *105
Pelletized adhesives (ppo) ..... Oct. 33
Aerosols—New interest in aerosols Mar. *83

Aluminum

Air-formed aluminum foil containers (ppo) ..... Sept. *33
All-aluminum pallet (e) ..... Sept. *145
Aluminum aerosol cap (ppo) ..... Aug. 31
Aluminum cans enhance beer shelf life (ppo) ..... Jan. 33
Deep, square, aluminum foil pan (ppo) ..... Dec. 33
Enters frozen field with Mexican specialties (pp) ..... Aug. *27
Heller Candy Co. (pp) ..... Nov. *28
Materials for packaging (ppo) .... Nov. 33
Oval aluminum foil containers (ppo) ..... Oct. 33

Bags

Film wraps for bulk packing (ppo) Apr. 31
Multi-layer, all-plastic shipping bags (ppo) ..... Sept. 33
Multi-pack for bread (ppo) ..... Mar. 35
Redesigns package (pp) ..... Aug. *26
Single-wall cookie bag (pp) ..... Feb. *26
Bottles—Plastic bottles surveyed (ppo) ..... Mar. 35

Cans

All-steel can holds promise (ppo) Nov. 33
Can improves product appearance (ppo) ..... June 31
More about tin-free can (ppo) .... Dec. 33
Pik-nik Co. (pp) ..... Dec. *30
Plastic can approved for crab meat. Kevin J. Hannigan ..... Dec. *88
Use of embossed cans to rise (ppo) ..... Sept. 33

Cartons

A gallon of ice cream in two ½-gal lock-end cartons (pp) ..... Mar. *30
Adopts redesigned, pre-glued carton (pp) ..... Oct. *26
Burry Biscuit Co. (pp) ..... Dec. *30
Carrier for one-way soft drink bottles (ppo) ..... Sept. 33
Easy-open overwrapped carton (ppo) ..... Apr. 31
Hinged-lid ice cream carton (ppo) Mar. *35
Ice cream carton (ppo) ..... Aug. *31
Ice cream carton (ppo) ..... Oct. 33
Improves product display ..... Aug. *102
Minimizes product damage ..... Sept. *142
Molded pulp egg carton (ppo) .... Sept. 33
New egg carton (ppo) ..... Feb. *35
New folding cartons designed to do a job ..... Mar. *70
New fun drink comes in paper cabin (pp) ..... Aug. *26
New ideas, materials for packager (ppo) ..... Aug. 31
New package (pp) ..... Nov. *30
Pack foods in milk cartons ..... July *110
Pour-spout carton (pp) ..... Feb. *30
Recloses tightly (pp) ..... Mar. *29
Redesigns duck carton (pp) ..... July 25
Teepee-shaped carton (pp) ..... Sept. *28
Zip-open cartons for frozen pizzas (pp) ..... Feb. *26

Cases

All-plastic case is light, durable (e) ..... July 118
Plastic beverage cases move ahead (ppo) ..... Jan. 33
Plastic cases catch on ..... Apr. *86

Casings

Converts for single tier (e) ..... July 130
Improves case sealing ..... July 112

Cellophane

Coated cellophane pouch (pp) .... Dec. *30
Colorful cookie pack (pp) ..... Mar. *29
Packs soft cookies in individual wraps (pp) ..... June *27
Wraps up sales (pp) ..... Aug. *26

Closures

Closures show ingenuity ..... Mar. *102
Snap-on plastic lids to gain (ppo) May 33
Composites—Spirals get new twist ..... Mar. *72

Containers

Air-formed aluminum foil containers (ppo) ..... Sept. *33
All-plastic mustard package (pp) Aug. *28
Corrugated container (ppo) ..... Dec. 33
Eliminates empty return trips .... Sept. *140
Epoxy-coated wooden container (e) ..... June *119
Lunch kit for Pan American Airways (pp) ..... May *33
Minimizes product damage ..... Sept. *142
Multi-layer, all-plastic shipping bags (ppo) ..... Sept. 33
Oval aluminum foil containers (ppo) ..... Oct. 33
Pan-packed pasta (pp) ..... June *27
Plastic containers and snap-on lids (ppo) ..... Sept. 33
Plastic milk bottles (ppo) ..... Sept. 33
Polyethylene basting cup (pp) .... Oct. *28
Polypropylene (e) ..... Aug. *105
Rigid, disposable, polyethylene containers (ppo) ..... Dec. 33
Saves with new containers (dib) .. Aug. 81
Self-service jar (pp) ..... Mar. *29
Soft drink landmark-bulk home dispensers (pp) ..... Sept. *26
Spirals get new twist ..... Mar. *72
Spiral-wound chipper (pp) ..... June *26

Films

Cast polypropylene film (ppo) .... Aug. 31
Crystal-clear window (pp) ..... Nov. *30
Eggo Food Products, Inc. (ppo) .. Oct. 33
Film wraps for bulk packing (ppo) Apr. 31
Heavier film helps boost sales (pp) ..... July 25
Ionomers—a new dimension ..... Mar. *85
Low and medium density polyethylene films (ppo) ..... Dec. 33
Modern saran fills high-barrier needs. Richard Dunbrook ..... Dec. *51
New construction (pp) ..... Sept. *28
Runs easily without dragback (ppo) ..... Nov. 33
Saran-coated film (ppo) ..... Aug. 31
Unique films created to meet multiple needs ..... Mar. *44

Foils

Air-formed aluminum foil containers (ppo) ..... Sept. 33
Oval aluminum foil containers (ppo) ..... Oct. 33
Status of steel foil (ppo) ..... Nov. 33

General

Advances in packaging (ppo) ..... May 33
Announce new packaging aids (ppo) ..... June 31
New aids to better packaging (ppo) ..... Mar. 35
New packages and products
Jan. *26 Feb. *26 Mar. *28
Apr. *26 May *28 June *26
July *24 Aug. *26 Sept. *26
Oct. *26 Nov. *26 Dec. *28
New packaging materials for processors (ppo) ..... May 33
News of containers, materials (ppo) ..... Apr. 31
News of materials, containers (ppo) ..... Feb. 35
Performance-minded materials (ppo) ..... July 31
Trends in meat packaging (ppo) .. Feb. 35
What's new for packaging (ppo) .. Jan. 33

Glass

Aunt Jane's foods (pp) ..... Aug. *28
Compact coffee jar (pp) ..... Dec. *29
Glass stays competitive ..... Mar. *100
New beet jar has no label (pp) .. Apr. *27
New-look bottle (pp) ..... Feb. *27
Packaging change streamlines pickle line (pp) ..... Mar. *28
Picks stylized design (pp) ..... Aug. *27
Polyethylene basting cup (pp) .... Oct. *28
Self-service jar (pp) ..... Mar. *29

Metals—Metals go modern ..... Mar. *96

Paper and Paperboard

Glassine pouch material (ppo) .... Oct. 33
Materials for packaging (ppo) .. Nov. 33
Rectangular package for frozen citrus juices (pp) ..... Nov. *27

Plastics

A honey of an idea (pp) ..... June *27
All-plastic case is light, durable (e) ..... July 118
All-plastic mustard package (pp) Aug. *28
Blow-molded plastic container for salt (ppo) ..... Apr. *31
Blow-molded polyethylene jar (pp) ..... Dec. *30
Borden's twin pack (pp) ..... Oct. *30
Competes with pulp tray (ppo) ... Dec. 33
Creates 'blister' pack for luncheon meats ..... Mar. *80
Easy-open composite can (ppo) .. Dec. *33
Engineers 3-ply plastic tube ..... Mar. *49
Fills milk into plastic bags ..... Dec. *115
Hires a robot ..... July 114
Modern saran fills high-barrier needs. Richard Dunbrook ..... Dec. *51
Multi-layer, all-plastic shipping bags (ppo) ..... Sept. 33
New construction (pp) ..... Sept. *28
New resin approved for food (ppo) ..... Sept. 33
Packer profits from new container (pp) ..... Mar. *28
Packs cold cuts in zip-open packs (pp) ..... Sept. *27
Plastic bottles surveyed (ppo) .... Mar. 35
Plastic can approved for crab meat. Kevin J. Hannigan ..... Dec. *88
Plastic cases catch on ..... Apr. *86
Plastic containers and snap-on lids (ppo) ..... Sept. 33
Plastic gallon jug debuts ..... Feb. *108
Plastic milk bottles (ppo) ..... Sept. 33
Plastic package protects, displays (pp) ..... Oct. *27
Polypropylene—Predicts gains for polypropylene (ppo) ..... Feb. 35
Rectangular package for frozen citrus juices (pp) ..... Nov. *27
Redesigns package (pp) ..... Aug. *26
Reduce costly 'can float'. Howard Sorensen ..... Oct. *66
'Rigids' gain steadily ..... Mar. *50
Vacuum-packing in plastic retards trout spoilage (at) (A) ..... Aug. 90

Pouches

Coated cellophane pouch (pp) .... Dec. *30
4-color pouches for dry roasted cashews and peanuts (pp) ..... Apr. *28
Glassine pouch material (ppo) .... Oct. 33
Rigids—Rigids gain steadily ..... Mar. *50
Shippers—Wax-impregnated, corrugated shipper (ppo) ..... Dec. 33
Shipping containers—Stress functional design ..... June *60
Steel—Extra-strong steel for cans (ppo) ..... Apr. 31

Tubes

Engineers 3-ply plastic tube ..... Mar. *49
Mustard marketed in plastic tubes (pp) ..... June *26

Packers

Hires a robot ..... July 114
Semi-automatic ..... July 106

Packing

Centralizing portion packing. Sam Bernheim and John V. Ziemba .. July 82
Open-end caser (e) ..... Aug. *105
Pointers on pump-packing maintenance (pi) ..... Oct. *81
Puts squeeze on fruit packs (ppo) Aug. 31

Paint—Non-toxic paint protects wood, metal (sm) ..... Mar. *164

Palletization

All-aluminum pallet (e) ..... Sept. *145
Automatic palletization. A. R. Nugarus ..... Apr. *89
Automatic palletizing gains ..... Sept. *100
Compact column palletizer ..... Jan. *121
Cuts handling costs with slip-sheet unloading (dib) ..... Mar. *93
Economy unit has advanced features (e) ..... Sept. *144
Pallet frames (e) ..... Sept. *145
Secures trailer loads with wrap and strap ..... Oct. *118
Speeds semi-automatic palletizing (e) ..... Oct. *140
Saves storage space (dio) ..... July 91

Pasteurization—Pasteurizes liquid egg whites ..... Apr. *102

Pastries—Toast 'em fruit-filled pop-ups (pp) ..... July 24

Patents—Modify through patents Covers: cereals, continuous processing, freezing, candy, agglomeration ..... Nov. *129

Peanuts

Cold-pack produces quality peanut butter ..... Nov. *92
Now: low-calorie peanuts (at) (A) ..... Aug. 89
Presses calories from nuts. Frank K. Lawler ..... Sept. *138

Pectin—High-quality pectin made from purple passion fruit (at) (A) ..... June 95

Peelers—Peels mechanically harvested tomatoes (e) ..... Apr. *132

Peeling—Acid peeling now possible (at) (A) ..... July 101

Pet Foods—Donut-shaped dog food (pp) ..... Sept. *27

Pickles

Aids pickle processing (pi) ..... Apr. 79
New 'concept' in pickles (pp) .... Jan. *27
Packaging change streamlines pickle line (pp) ..... Mar. *28
Sweet cherry pickles awaiting your call. Robert L. Smith ..... Feb. *85

Pies—Deep-dish pies: family of heavyweights (pp) ..... Jan. *26

Pipes—Plastic-metal piping requires no maintenance (sm) ..... Nov. *173

Piping—Flexible cryogenic piping is quickly installed (e) ..... Apr. 134

Pitter—Double-lane aligner and pitter (e) ..... Jan. *131

Pizza—Pizza pan 'breathes' (pp) .. May *29

Plant Equipment

Deep-fat pressure fryers (pi) .... Aug. 65
Equipment performance checklists Sept. 106
Square-can opener (e) ..... Oct. *147

Plant Sites—Transport factors vital in selecting plant sites. Richard F. Torrey ..... Sept. *88

Potatoes

Eases material handling (pi) .... Sept. 77
Potato granules directly (at) (A) Mar. 116
Shear test helps select potatoes for french fries (pi) ..... Nov. 95

Poultry

Duckling quality gains as techniques improve. John V. Ziemba Jan. *102
Flavor components identified in chicken (at) (A) ..... Oct. 123

Powders

Cheaper way to make nonfat milk powder (at) (A) ..... Sept. 104
Garlic and onion powders (ia) .... Oct. 153
Making pumpkin powder can be profitable. V. A. Turkot, M. Komanowsky, R. K. Eskew (tables) .. July *78
Powdered fat emulsions 'tailored' to functions. P. P. Noznick and others ..... June *68
Powdered onion, garlic now easier to handle (ia) ..... June 128
Speeds powder filling (e) ..... Aug. *106

Preservatives—Licenses use of EDTA in dressing products (ia) ..... June 128

Presses—Honeycomb extrusion press (e) ..... Oct. *141

*Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents.

Index to Vol. 37, January 1965 to December 1965

Printers—Remote printer logs data from any digital source (e) ....Feb. *112

Printing
Imprinter .....July 106
In-line drum-lid printer (e) .....Dec. *127
Versatile press (e) .....June *119

Processing
Automatic line .....Aug. *94
Branches main lines into multi-processing. John V. Ziemba .....Nov. *88
Cold-pack produces quality peanut butter .....Nov. *92
Duckling quality gains as techniques improve. John V. Ziemba .....Jan. *102
Europe improves processes. John H. Nair .....July 63
Japan's changing diet paces its food industry. Samuel A. Goldblith ..Apr. *61
Makes edible oils by remote control. J. Philip Geddes .....Nov. *73
Membrane processes arrive. Frank K. Lawler .....Nov. *58
New processing technique (ia) ...Sept. 162
Presses calories from nuts. Frank K. Lawler .....Sept. *138
Process for low-fat, high-protein cheese (at) (A) .....Sept. 105
Simplifies production of coffee whitener (ia) .....Dec. 133
Upgrades cheese whey, solves disposal problem (dib .....Nov. *113
Vinegar-making leaps ahead. Dr. H. Ebner .....Aug. *42
What's new in Europe? Anthony H. Woollen .....Nov. *99

Processing Equipment
Controlled vibration. E. A. Wahl ..Oct. *62
Cooks, shapes, extrudes cereal grains (e) .....June *123
Double-lane aligner and pitter (e) Jan. *131
Easy-to-clean bottomer .....Aug. *94
In-line chopper speeds product flow (e) .....Nov. *168
Modernizes step-by-step. Kevin J. Hannigan .....Oct. *112
Processes 500 aluminum cans per min (e) .....Oct. *142
Sterile processor is self-contained (e) .....Oct. *140

Programming—Step controller offers accurate programming (e) .....Feb. *113

Proportioning
Centralizes portion packing. Sam Bernheim and John V. Ziemba ..July 82
Portion-packed dry milk is made with cream (pp) .....Sept. *26

Proteins
All-dairy product offers lower-cost milk protein (ia) .....Aug. *115
Multi-function caseinate (ia) .....July 136

Pulper—Lab-size pulper .....Apr. *119

Pulverizers—Advanced pulverizer ..Aug. *93

Pumps
Air-operated unit pumps wide range of foods (e) .....May *166
Centrifugal pumps excel in processing, CIP (e) .....Dec. 129
Chopper pump (e) .....Apr. *133
Constant-pressure pumping system (e) .....Jan. *131
Efficient vacuum pump offers quiet operation (e) .....Oct. *149
For sterile handling (e) .....July 127
Handles lumpy material (e) .....Aug. *112
Makes efficient use of small gear pumps (dib) .....Apr. *95
Offers smooth pumping (e) .....Feb. *113
Pointers on pump-packing maintenance (pi) .....Oct. *81
Pump connector (e) .....Sept. *145
Pump control (e) .....Sept. *145
Reduces pumping costs (dib) ....Mar. *93
Special pump handles tough disposal problem (dib) .....Dec. *97
Removes water from vacuum-pump oil (sm) .....Dec. *134
Stainless steel rotary pump (e) ..June *124
Versatile pump reduces downtime (e) .....Feb. *110

Q

Quality Control
California adopts can-seam inspection .....Aug. *67
Checks cans for vacuum—at 500 per min .....Oct. *131
Computer evaluation of wheat quality data (at) (A) .....July 101
Controlled crystallization—key to product quality. John P. Bolanowski .....Dec. *56
Giant plant gives Borden .....Sept. *68
Improves brick chili (ia) .....Sept. 162
In search of profits .....Feb. 87
Integrated operations: Key to continuous 'franks'. John V. Ziemba..Nov. *77
Mogen David innovates wine-making. Edward Gogel and John V. Ziemba (flowsheet) .....Apr. *69
New flexible packaging center (ppo) .....Aug. 31
Shear test helps select potatoes for french fries (pi) .....Nov. 95
Water-repellent starch guards product quality (ia) .....Sept. 162

R

Radiation—Sensitization of spores to radiation in meat (at) (A) ....Jan. 115

Railcars
Speeds cargo handling .....Apr. *123
Tests new grain car (dib) .....June 79

Recorders
Analyzer .....Aug. *92
Color intensity recorder .....Aug. *92
Electronic system gages minute displacements (e) .....Aug. *106
Eliminates scale-reading errors (e) .....Aug. *104
Integrates recorded data, gives digital readout (e) .....Aug. *109
Portable mass spectrometer (fl) ..Oct. 151
Recording checkweigher improves quality control (e) .....Oct. *146
Save control-panel space (e) ....Aug. *105
3-in-1 (e) .....Oct. *141
Warns of low or high package weight (e) .....Aug. *104

Refrigeration
Cooled to order. M. R. Overbye ...Apr. *74
Engineers new rail-car-refrigeration system (dib) .....Sept. *95
5th-wheel refrigeration unit saves trailer cargo space (e) .....Mar. *153
Gas engines cut costs .....Sept. *96
Prevents breakdown of main refrigeration. Robert Cummings ....Sept. *103
Uses special refrigerant as brine ..Feb. *92
Wall units cut refrigeration costs June *116

Regulations—Regulations for '65. Alex K. Porianda .....Jan. 51

Rendering—Hormel's HTST processing improves continuous rendering .....June *114

Research
Measuring the growth of alpha-lactose crystals (at) (A) .....May *128
Measuring thermal diffusivity of foods (at) (A) .....Sept. *104
R & D guides Green Giant—part I. John V. Ziemba .....Dec. *47
Universities intensify research ....Feb. *93

Resins—New resin approved for food (ppo) .....Sept. 33

Rheology—Rheology can help you. George M. Kovac and John V. Ziemba .....Feb. *81

Rice
A high-protein flour made from parboiled rice (at) (A) .....Dec. 107
Heat & eat fried rice (pp) .....Mar. *28
Rice-with-spice mix (pp) .....June *27
Simplified color sorter (e) .....Sept. *147

Rollers—Let rolls work for you ....Feb. *60

Roofs—Roof resurfacer (sm) .....Sept. *161

Rotors—New rotor ups meter's linear range (e) .....Mar. *153

Russia—Russia makes progress in food irradiation. Vadim Zagoryansky..Nov. 57

S

Safety
Dramatizes safety principles (tm).Aug. 53
Equipment performance checklists .....Sept. 106
Housed in stainless steel (e) ....July 124
How to plan safety program (tm)..May 65
Makes cold-storage door an emergency exit (pi) .....Jan. *84
Offers safety program (tm) .....June 53
Photocell improves safety (pi) ..Jan. 83
Portable grating floor prevents slipping (sm) .....Jan. *133
Safe ways to discard empty pesticide cans (pi) .....Mar. 79
Steel floor mat promotes non-slip safety (sm) .....July 134

Salads—Frozen salad in plastic pouch (pp) .....Mar. *28

Salts—Salt effect on dough (at) (A).Sept. 105

Samplers—Eases liquid sampling (e).Mar. *161

Sanitation
Combines two-way cleaning, special detergent to wash plastic beverage cases, cartons (sm) .....Oct. *152
For heavy-duty cleaning (sm) ...July 134
Hand-grip cleaning tool (sm)....Oct. 152
Insecticide fog generator (sm) ..Sept. *160
Repels rodent pests .....Oct. *135
Rotor-jet unit provides sanitary tank cleaning (sm) .....Aug. 114
Sanitizer (sm) .....Mar. 164
Steel floor mat promotes non-slip safety (sm) .....July 134
Switchover system (e) .....Apr. *133
Timed aerosol bomb offers 24-hr control (sm) .....Aug. *114
Tips on housekeeping (pi) .....Jan. 83
Use of hexachlorophene soaps (pi) .....May 89

Sauces
Buttered barbecue sauce (pp) ....Oct. *27
Simplifies producing vegetables in sauces (ia) .....Aug. 115
Versatile sauce (pp).. .....Feb. *27

Sausage Casing—Extrudes, coats sausage .....Nov. *164

Scales
Checkweigh scale (e) .....Mar. *158
Offer many new features (e) .....Feb. *116
Speeds material flow (e) .....Feb. *113

Scanners
High-speed optical scanner .....Jan. *120
Scans small objects (e) .....Apr. *134

Screw Conveyors—Pre-engineered unit speeds delivery, assembly (e) ....May *162

Seasonings
Powdered onion, garlic now easier to handle (ia) .....June 128
Prolongs shelf life of frozen pork sausage .....June 110

Separators—Simplified color sorter (e) .....Sept. *147

Shipping
Collapsible bag permits efficient 2-way haul (pi) .....May *89
Minimizes product damage .....Sept. *142
New shipper-displayer for dried apple dice (pp) .....July 25

Shortenings—Improve product performance .....Aug. *77

Shrink Tunnels—Heavy-duty shrink tunnel .....June *100

Shrinking—Shrink-Wraps tray packs (e) .....July 128

Sifters—Sifters meet new 3-A standard (e) .....Nov. *168

Size Grader—Size grader and corer..Apr. *119

Size Reduction
Crusher-disintegrator (e) .....Dec. *127
In-line chopper speeds product flow (e) .....Nov. *168

Sizers—Sizes by width, thickness (e) .....Mar. *159

Smoking—Fully automatic smokehouse .....July 107

Snacks
Adds to line (pp) .....Jan. *26
Cap'n Crunch cookies (pp) .....Oct. *30
Fried pork snacks (pp) .....July 24
Improves extrusion of snack foods (e) .....Nov. *168
New product with south-of-border flavor (pp) .....Oct. *26
Versatile snack food made from wheat (pp) .....May *28

Sorters—Multi-station bottle sorter.Jan. *120

Soups—Solid soup base is made to measure (pp) .....Dec. *28

Soymilk—Pilot plant process produces quality dry soymilk (at) (A) .....Feb. *103

Spectrophotometer—Spectrophotometer has reflectance accessory (fl) ..Mar. 163

Spectroscope—Quickly detects metals imparts-per-billion (fl) .....Mar. *162

Spices
Chef's compliments—for the housewife (pp) .....Nov. *27
Improves spice quality (ia) .....Feb. 119

Stabilizers
Cold-soluble alginate .....May 56
Disperses quickly in cold-mix formulas .....May *51
Irradiated bacon stability (at) (A) .....Aug. 89
New flour stabilizer aids bread making .....May 115
Stabilizes seafood sauce (ia) .....Jan. 134

Standards—Straighten out standards problems in '65 (ed) .....Jan. *41

Starches
Batter-mix starch (ia) .....Oct. 153
Cuts starch-handling cost (ia) ...Dec. 132
Food starches. John V. Ziemba ...Oct. *71
Starch improves stability of low-pH foods (ia) .....July 136
Starch permits quicker cook .....May *59
Water-repellent starch guards product quality (ia) .....Sept. 162
Yields high-quality gluten. Frank Morton .....Dec. *83

Steam Traps—High-capacity (e) ...Dec. *127

Sterilization—Keeps milk fresh for 6 months—without refrigeration ..June *104

Sterilizing
Europe improves processes. John H. Nair .....July 63
Sterilizing agent (sm) .....Oct. 152

Stills—Provides 1 liter per hr of extremely pure water (fl) .....Dec. *131

Storage
CO_2 adsorption simplifies CA storage .....Apr. *129
Economical double-entry storage rack (e) .....Mar. *160
Live-storage rack (e) .....Sept. *145
Saves storage space (dib) .....July 91
Saves with new containers (dib) ..Aug. 81
Stores 24 tons of CO_2 (e) .....Oct. *149
Stores V-belts efficiently (pi) ....Aug. *66

Strapping—Secures trailer loads with wrap and strap .....Oct. *118

Strapping Equipment—Pneumatic tensioner (e) .....May *160

Sugars
Four precautions avoid dextrose crystallization (pi) .....Apr. 79
Free-flowing brown sugars ease handling problems. M. D. Miller and G. E. Spaulding, Jr. .....May *110
In-plant syrup producer reduces sweetener cost .....June *108
Quick test for glucose (fl) .....July 132

Supplier Services—Ingredient suppliers .....May *66

Sweeteners
Licorice derivative cuts sweetener costs .....Aug. *99
'Miracle fruit' presents new sweetness concept (at) (A) .....Jan. 114
Sweeteners: natural and synthetic. C. B. Broeg .....Jan. *66
Synthetic sweeteners: A way to new profits .....May *74

Switches
Horizontal switch (e) .....Aug. *112
Housed in stainless steel (e) .....July 124

Syrups—Papaya product (pp) .....Jan. *26

T

Tablets—New canning tablets .....May *57

Tanks
'Best vinegar plant' built by Morton .....Aug. 45
Reinforced-plastic lining cuts initial tank costs (e) .....Nov. 170
Spun-cast fiberglass-plastic tanks .Apr. *119

Taste Tests—Flavor preference tests in creamed cottage cheese (at) (A) .....Oct. 124

Temperature
Influence of temperature on bacteria in eggs (at) (A) .....Dec. 107
Simple technique for cans gages average temperature. Don Schott Apr. *105
Simultaneously controls temperature, humidity (e) .....Nov. *169
Uses latest equipment for environmental tests (dib) .....May *101

Tempering—Cooling tower .....Aug. *92

Tomatoes
Packaging tomato ketchup in plastic and aluminum (at) (A) .....July 102
Tomato harvester (e) .....Nov. 172

Toteboxes
Box is light but tough (e) .....Mar. *157
Plastic toteboxes (e) .....Mar. *155

Transmission—Eliminates belt whipping (e) .....Aug. *108

Transportation—Transport factors vital in selecting plant sites. Richard F. Torrey .....Sept. *88

Trays—Curbs damage to candy (dib) .....May 102

Trucks and Trucking
Air-powered (e) .....Oct. *147
All-aluminum reefer (e) .....Feb. *116
Aluminum cab-overs offer many driver advantages (e) .....Mar. *156
Checks tire performance (dib) ...Oct. *109
Compact cooler-heater offers many advantages (e) .....Oct. *147
Cools trucks quickly (dib) .....Aug. *81
5th-wheel refrigeration unit saves trailer cargo space (e) .....Mar. *153
Handling made easier .....Feb. *71
"Piggy back" system (e) .....Mar. *154
Rapidly converts a truck for firefighting (pi) .....Aug. *65
'66 trucks (e) .....Nov. *170
Uses own trailer for bulk-flour shipments (pi) .....Mar. *79

Tubing—Clear ionomer tubing offers many advantages (e) .....Dec. 130

Turbines—Turbine reduces power costs .....Nov. *166

U

Ultrasonics
Liquid-level gage (e) .....Dec. *131
Repels rodent pests .....Oct. *135

Uncasers—Bottle uncaser .....Jan. *120

Unit Operations—New in unit operations
Covers: heat applications, refrigeration, pickling, curing, freezing, fermentation, moisture removal, instrumentation, enzymatic processes, separation, forming, coating, ultrasonics .....Nov. *116

V

Vacuum-Packing—Vacuum-packing in plastic retards trout spoilage ..Aug. 90

Valves
Ball valve's (e) .....Sept. *145
Diaphragm-valve design improves control (e) .....Nov. *172
Miniature stack-type valves (e) ..Aug. *108
Pneumatic valve provides efficient solids handling (e) .....July 126
Sanitary ball valve (e) .....Dec. *127
Simplifies kettle operation (e) ....Nov. *172
Swinging slide valves (e) .....Oct. *146
Tips on valve handling (pi) .....Mar. 79
Ups valve performance (e) .....Feb. *111
Valve system permits versatile flow control (pi) .....Nov. *95

Vegetables
Better dehydrated celery through USDA process (at) (A) .....Oct. 124
Branches main lines into multi-processing. John V. Ziemba .....Nov. *88
Corrects shortage situation (tm) ..Nov. 69
Dried carrots off-flavor (at) (A) ..June 96
Grow mushrooms easily on garbage compost (at) (A) .....July 101
Institutional line heads product splurge (pp) .....Nov. *26
Simplifies producing vegetables in sauces (ia) .....Aug. 115

Vibrators—Curbs bottle jam-up (dib) .....Jan. *98

Vinegar
'Best Vinegar Plant' built by Morton .....Aug. 45
For salad makers (pp) .....May *29
Pure culture of bacteria for making quick vinegar (at) (A) .....Nov. 138
Vinegar-making leaps ahead. Dr. H. Ebner .....Aug. *42

W

Wages—Wages continue to rise (tm) .....Jan. 61

Waste Disposal
Eases waste disposal .....June *112
Simplifies drum dumping (pi) ....Oct. *81
Special pump handles tough disposal problem (dib) .....Dec. *97
'Throw-away' inflatable dunnage bag (e) .....Aug. *109
Treatment by activated sludge studied as aid in cannery waste disposal (flowsheet) (at) (A) ..July *101

Water Treatment
Equipment performance checklists Sept. 106
Irradiator unit (e) .....Aug. *108
Retort water treatment (sm) ....Nov. 174

Weighing
Conveyorized weighers . . . John V. Ziemba .....Dec. *67
Precision net weigher fills free-flowing items (e) .....Sept. *147
Speeds scaling of minor ingredients Oct. *134

Wetting Agent—Wetting agent improves quality of sterile milk (ia) .....Dec. 133

Wheat
Amino acids in hard wheat vary with N_2 content (at) (A) .....May 128
Computer evaluation of wheat quality data (at) (A) .....July 101
Cooling tower .....Aug. *92
Irradiated-wheat quality depends on dosage (at) (A) .....May 128
Study shows reliability of sedimentation test (at) (A) .....Feb. 103
Wafers made from toasted bulgured wheat kernel (ia) .....June *128
Yields high-quality gluten. Frank Morton .....Dec. *83

Whiteners—Simplifies production of coffee whitener (ia) .....Dec. 133

Wine—Mogen David innovates wine-making. Edward Gogel and John V. Ziemba (flowsheet) .....Apr. *69

Y

Yolk—How egg-yolk color affects sponge cakes (at) (A) .....July 102

AUTHOR'S INDEX

JANUARY TO DECEMBER 1965

A

Atherton, J. L.—Carnation speeds packaging .....Aug. *61

B

Babb, E. M. and Johnson, M. A.—Reduce operational costs .....Apr. *98
Barr, George and Ziemba, John V.—What contract packaging can do for you .....Mar. *66
Bernheim, Sam and Ziemba, John V.—Centralizes portion packing .....July *82
Bolanowski, John P.—Controlled crystallization—key to product quality .....Dec. *56
Heat exchange—make it more efficient .....Feb. *43
Bolin, H. R. and others—New: dried fruit disks for cold cereals ....Aug. *85
Broeg, C. B.—Sweeteners: natural and synthetic .....Jan. *66

C

Cofer, H. J., Jr.—Management information system provides tighter control .....Feb. *49
Cording, J., Jr. and others—Superheated steam aids explosive puffing .....Oct. *116
Cummings, Robert—Prevents breakdown of main refrigeration ....Sept. *103

D

Delin, J. and Lederer, S.—Formulates malt liquor into "champagne" beer .....Jan. *77
Dunbrook, Richard—Modern saran fills high-barrier needs .....Dec. *51

E

Ebner, Dr. H.—Vinegar-making leaps ahead .....Aug. *42
Eskew, R. K. and others—Superheated steam aids explosive puffing ..Oct. *116
Making pumpkin powder can be profitable .....July *78

*Illustrated. (A) Abstract. (e) Equipment. (ed) Editorial. (P) Patents.

Index to Vol. 37, January 1965 to December 1965

F

Feiges, David M.—In one week: converts storeroom to freezer .....Feb. *106

G

Geddes, J. Philip—Automation aids small packers .....Jan. *90
Makes edible oils by remote control .....Nov. *73
Systems engineering builds plant .Nov. *64
Gogel, Edward and Ziemba, John V.—Mogen David innovates winemaking (flowsheet) .....Apr. *69
Goldblith, Samuel A.—Japan's changing diet paces its food industry Apr. *61
Griffin, E. L., Jr. and Pfeifer, V.—Multiplies flour varieties .....Jan. *86

H

Hannigan, Kevin J.—Ingredients spark new products .....June *29
Modernizes step-by-step .....Oct. *112
Plastic can approved for crab meat .....Dec. *88
Heiland, W. K. and others—Superheated steam aids explosive puffing ..Oct. *116
Hertzendorf, Martin—Critical properties of air .....July *98
Hill, Wilkes E.—Keep your compressed air pure, dry .....June *90
Hoerr, Charles W. and Ziemba, John V.—Fat crystallography points way to quality .....May *90

I

Israelson, Arlo F.—Handling with magnets .....Jan. *106

J

Johnson, M. A. and Babb, E. M.—Reduce operational costs .....Apr. *98

K

Kahn, Herbert L.—Atomic absorption speeds precision trace-metal analysis .....May *105
Karels, H. A., Jr. and others—A step ahead in automation (flowsheet) June *45
Kaufman, V. F. and others—Hex-tube freeze-dryer permits continuous F-D .....Apr. *49
King, Dr. Glen—Food, fats and foibles .....Aug. *56
Kirk, Drexel B.—How to maintain gas-powered lift trucks .....Dec. *102
Komanowsky, M. and others—Making pumpkin powder can be profitable .....July *78
Kovac, George M. and Ziemba, John V.—Rheology can help you ....Feb. *81
